

Identify food intolerances for better patient health

Precision testing with **IgG-based analysis**

Symptoms of food intolerances

IgG-based immune reactions tend to be **much slower** than those associated with allergies. You usually get symptoms a few hours after eating the food or ingredient you're intolerant to and the symptoms can last for a few hours or days. Symptoms include tummy pain, headache and diarrhea.

Tummy pain

Headache

Diarrhea

Innoquest Pathology's wide and comprehensive food intolerance tests
